Technical Webinar Invitation

“IoT End-to-End Solution”Trends and Challenges

Introduction to /IoTConnect® –The all-in-one, comprehensive enterprise IoT platform.

Presented by EBV

AVNET Reach Further™ /IOTCONNECT Microsoft Azure softweb solutions An Avnet Company

Secure Wireless Connectivity is a key strategic decision for many companies in numerous markets. Component selection to provide the required connection is only the start of the process. It is then necessary to navigate a complex software environment to provide secure connection from device to cloud. Multiple skill-sets and various 3rd parties may be required to optimise a solution. EBV, together with our Avnet colleagues at Softweb Solutions present /IoTConnect®; a cloud-based, highly scalable IoT & AI platform. By leveraging Microsoft’s enterprise-grade Azure cloud service, we offer an IoT platform that provides fast, secure and scalable flexibility. The /IoTConnect® Platform helps boost efficiency, better manage assets and quickly adopt innovation. The platform helps enterprises build and deploy innovative applications and solutions that transform real-time operational data into insightful information to make smarter decisions. /IoTConnect®, coupled with semiconductor solutions from EBV’s franchise partners provides a complete end-to-end solution that is cost-effective, quick to implement, scalable, highly secure, and supported by one vendor.

Key Features

- Production Ready
- Multi-layer security
- Easy integration and connections
- Edge and predictive analytics
- Easy configuration and management
- Real-time alerts and notifications

Speakers

Thibault Richard

Connectivity FAE, EBV Elektronik

Borut Kastelic

IoT SSL, EBV Elektronik

Agenda

IoT End-to-End Solution

- Overview
- IoT Ecosystem

/IoTConnect® Platform

- Cloud Services
- Backend
- Frontend
- iOS/Android User App

Device and Gateway Solutions

- Secured Connected Device
- Industrial IoT Gateway

/IoTConnect® Platform Demo

- SmartFleet Example

Q&A

Free of charge Technical Webinar with content delivered by connectivity specialists from EBV, Avnet and Softweb Solutions.

The Webinar will be held with Microsoft Teams.
